Barcelona, Spain

## Languages

**Spanish and Catalan:** Native

**English:** Official B2 Certificate

**Korean:** A2 - B1

## Skills

- Teamwork with directors, actors, and other departments
- Ability to work under pressure and meet deadlines
- Attention to detail and patience
- Flexibility and quick learning of new techniques

## Professional profile

Professional makeup artist specializing in characterization, prosthetics, and special effects for film, television, advertising, and live shows. Experience in shoots with high levels of blood effects, realistic prosthetics, and tube systems, as well as in editorial-style shoots with artistic or beauty prosthetics. I stand out for my creativity, versatility, and ability to work as part of a team under pressure.

## Professional experience

### Film & Media Productions

- Experience in short films and independent projects with prosthetics, blood, wounds, gore effects, and liquid pumping systems.
- Worked with national and international teams, sometimes leading and other times providing support.
- Creation of characters makeup and effects on set, adapting materials and processes to the needs of the shoot.
- Coordination with actors, direction, and all departments to maintain visual consistency and production pace.

### Horror Attractions & Live Shows

- Makeup artist and character designer for haunted houses and themed events, creating blood effects, wounds, quick prosthetics, and real-time touch-ups.

### Editorial & Shoots

- Participation in editorial-style photo shoots with prosthetics and conceptual artistic makeup.
- Creation of textures, colors, and shapes adapted to the visual language of each project.

### Advertising & TV Makeup

- Experience in advertising campaigns and television projects, performing beauty makeup.
- Eight months of internship at TV3, on the Betapodcast program: time management, reading scripts, and technical assistance during filming.

### Workshop Experience

- Experience in Thuya Escuela's special effects and prosthetics workshop: creation of molds, sculptures, silicone and foam prosthetics, use of fiberglass, resins, and assembly of tube systems for blood effects.
- Collaboration in the development of materials, stock control, and teaching support at the school (2024-2025 academic year).

---

## Technical skills

- Creation and application of silicone, latex, and polyurethane foam prosthetics.
- Impression taking, mold creation, modeling, and hyperrealistic painting.
- Proficiency in Photoshop, ZBrush, Canva, Word, PowerPoint, Genially, and ibis Paint X.
- Design of characters, wounds, deformities, and creatures.
- Control of blood pumping systems and practical effects.
- Script breakdown and shooting schedule.  
Preparation of technical data sheets.
